

IMPORTANT NOTICE TO ALL MEDICAID PROVIDERS

As of March 24, physicians in the state Medicaid program must update and verify key demographic information in the Provider Information Management System every six months to make sure their information is correct in the Online Provider Lookup, the Medicaid & Healthcare Partnership (TMHP) advises.

They will not be able to use any applications from your accounts on the TMHP secure portal, including TexMedConnect Acute Care, if they do not update the information.

The information that must be updated includes primary or alternate physical address, telephone numbers, e-mail addresses, office hours, counties served, and patient age and gender limitations.

For more information, call TMHP at (800) 925-9126 or (800) 568-2413, or visit the TMHP website.
